During this 6-week Online class students will learn to create moulds of any solid object of their choice and to create a cast in Hydrocal, a plaster-containing gypsum product somewhat stronger than Plaster of Paris. We then go through each step of the ancient method of traditional water gilding, from preparing rabbit skin glue size, gesso, and bole to gilding, burnishing, and toning.

Learn the Traditional Method of Water Gilding and create a personal object of art as a decorative accessory, art for display, or a simple Touchstone for your desk, beautifully gilded and burnished in genuine 23k gold leaf!

Fascinated by the thought of gilding but simply don't know where to begin? Then this is the class to take - Gilding... *for Absolute beginners!*

We all need to start somewhere and this Introductory gilding class is designed for those just beginning. Students will learn during their first class to gild an object in stone using brass leaf (imitation gold)

and the use of acrylic emulsion as the gilding adhesive. It's what's known as a mordant and like all acrylics, it's water-based and cleans with soap and water but dries permanently creating an excellent bond for gold and other metal leafs to a variety of surfaces. ~
